ICT Development Index (IDI) by ITU

Proposed IDI 2020

	Weights (indicators)	Weights (sub indices)
ICT access		0.40
1. Fixed-telephone subscriptions per 100 inhabitants	0.20	
2. Mobile-cellular telephone subscriptions per 100 inhabitants	0.20	
3. International Internet bandwidth per Internet user	0.20	
4. Percentage of households with a computer	0.20	
5. Percentage of households with Internet access	0.20	
ICT use		0.40
6. Percentage of individuals using the Internet	0.33	
7. Fixed-broadband Internet subscriptions per 100 inhabitants	0.33	
8. Active mobile-broadband subscriptions per 100 inhabitants	0.33	
ICT skills		0.20
9. Mean years of schooling	0.33	
10. Secondary gross enrolment ratio	0.33	
11. Tertiary gross enrolment ratio	0.33

Recommendations

to Drive Technology
Adoption Level
in Thailand

Key Recommendations for Thailand to Drive Technology Adoption

Key Recommendations for Thailand to Drive Technology Adoption

Digital Infrastructure - Facilitate 'Connectivity to All'

Develop a **National Broadband Strategy** to increase the network reach, especially in rural areas of Thailand

Constitute **funding schemes** to provide affordable connectivity for poor

Reduce regulatory bottlenecks for quick nationwide rollout of 5G services

Consider implementing '**tax free connectivity**' for 5 years

Digital Infrastructure - Establish 'Digital Identity for All'

Create a **good digital identity to all citizens** preferably using biometric technologies

Provide the required **legal backing** for digital identity

Promote common **digital identity standards**

Adopt a **collaborative approach** for widespread adoption of digital identity by involving banks, telcos, IT firms, government & industry bodies

Digital Infrastructure - Build 'Digital Security Infrastructure'

Establish a **specialized government agency to identify cyber threats**, provide technical cyber security advice and guidance, and builds partnerships with critical infrastructure, industry and government

Build **understanding of cyber security risk** at leadership level

Address confusion and fragmentation in regulatory framework on cyber thefts and attacks

Develop **global cooperation and partnerships** for fight against cybercrimes

Develop and implement a **Digital Safety Act** to ensure better protections for all citizens from cybercrime

Encourage **technical innovation and R&D** to combat security threats

Create a **framework for Intelligence sharing** between emergency response teams, law enforcement agencies and other relevant departments

Digital Infrastructure - Facilitate 'Funding for Infrastructure'

Set up an '**universal access fund**' to support Thailand's digital infrastructure

Explore **Data Monetization** through collaboration

Consider setting up a "**Technology Bank**" to provide loans for digital projects

Standard & Regulation - Development of Standards

Always give priority and importance for **Open Standards**

Try to adopt the most widely accepted **international standards**

Involve the local ICT Industry in developing and setting up **digital standards**

Standard & Regulation - Foster Global Digital Cooperation

Aim for equitable outcomes; while digital cooperation should support the global public interest, it should be clear around how it can benefit Thailand

Create shared **understanding and purpose across bodies** on different policy areas related to global cooperation

Standard & Regulation - Policy Formulation

Recognising the political and socio-economic need for ubiquitous broadband, formulate policies to **facilitate nationwide broadband** using a mix of cable/fibre, wireless, satellite and other technologies

Develop a detailed plan for effective **spectrum allocation and management**

Establish clarity in **roles & responsibility for all stakeholders** (multiple government agencies, private sector, international organizations and academia) in digital industry

Adopting or revising **national broadband plans**

Set up **"Policy labs"** (protected spaces within government) with an explicit mandate to experiment with new methods of policy development by using agile principles

Make **sustainable digitalisation** an overarching goal for the government

Try **crowdsourcing for policy-making** to enable a more inclusive and participatory rule-making process

Adopt a **"Tech-neutral"** approach to prevent lock into specific technologies

Service Improvement - Develop Institutional Capacity

Provide an **institutional framework for sustaining and developing any important initiatives of government.** These institutions should be empowered to set strategy and drive implementation

Service Improvement - Building Trust

Development of a common and consistent **risk-based framework** which clearly defines accountability and can be easily enforced

Private-public cooperation to develop shared strategies for industry transformation

Invest in national level **digital awareness program**

Help policymakers identify and understand objective **privacy risks** to individuals, business and nation

Service Improvement - Data as a driver of growth

Facilitating access to
in-demand and useful
public data

Push government &
industry to **adopt Artificial
Intelligence** wherever
possible for decision
making

Create a platform for **data
exchange** and support
innovations &
experimentations in
Blockchain

Service Improvement - Industry Support

Create a forum to address
**conflict resolution & crisis
management** in digital
industry

Create a **digital business**
to support the growth of
Fintech sector & drive
Fintech adoption

Provide a digital lift for
Thailand's SME with access
to **platforms & tools for
R&D** as well as
**Regulatory
supports**

Manpower - Protect Human Rights

Create a **legal framework for permitting location-based services** such as mapping or advertising that are potential sources of security and privacy risks

Create a policy to **regulate Internet services** and prevent removing, blocking, filtering content, or deactivate individual user accounts

Manpower - Build an Inclusive Digital Economy

Facilitate the growth of relevant digital **content in local language**

Provide cheap and ubiquitous **Internet access to all citizens**

Monitor and track the **quality of access/speed at all locations** and take effective corrective steps

Include **digital literacy in academics** at school level

Initiate **training programs** to get elderly population to enter the digital bandwagon

Take effective policy decision to **reduce the rural-urban divide**

Manpower - Skill Building

Conduct a study to **identify the extent of digital skill gap** in Thailand for various emerging technologies

Facilitate **training programs** in partnership with industry and academia

Establish a **Cybersecurity Research Centre** is helping government upskill the cybersecurity skills of technology students

Enhance the availability of **data analytics professionals** to tap into the global demand for these skills

Research & Development - Institutional Support

Create a competent **institution to defend intellectual property** and prevent ICT-enabled theft of intellectual property

Facilitate **Regulatory sandboxes** to support innovation. These are safe spaces for companies to test innovative products, services and business models without needing to overcome the normal regulatory and financial hurdles

Research & Development - Collaboration and Funding for R&D

Collaboration

Promoting **collaboration between regulators and innovators**; helps innovators to address legislative obstacles by shortening the time between the idea stage and bringing the innovation to market

Funding for R&D

Start up separate **funds to promote innovations**

Recommendations to Enterprises for Digital Transformation

Recommendations to Enterprises for Digital Transformation

DIGITAL Enterprise

3

Scaling up

- Build capabilities
- Adopt a new agile operating model

1

Digital Transformation Planning

- Secure senior management commitment
- Aligning the Digital Goals an Enterprise with its strategic goals
- Secure investment

2

Launch & Acceleration

- Appoint a high-calibre core team
- Prioritisation of Projects
- Reorganise to Support digital transformation
- Nurture a digital culture

Roles of Thailand

in International Forums
for Driving Digital Adoption
to Reshape
e-Transactions
in Thailand

Why participating in International Forums?

To create new opportunities for businesses across the globe which are essential for the growth of the digital economy by enhancing **Digital Cooperation**

Standardization for Digital Cooperation to Support Technology Adoption

Enhancing digital cooperation encompasses both **reinvigorating existing multilateral partnerships** and creation of **new mechanisms that involve stakeholders** from business, academia, civil society and technical organizations.

Conscious efforts are being made by **international standard-setting organisations to facilitate the participation of all stakeholders as well as drive digital adoption**

Next Steps for Thailand in International Forums

Participate in as many forums as possible

Engaging with multilateral bodies and inter-governmental dialogues on digital trade and engagements. Thailand should make attempt to harmonise the standards on a regional basis.

Develop Internal Expertise on Standards

Having enough resources & technical skills to participate and influence in all stages of international standard development process as well as upskilling the concerned team.

Involve Local Industry for Standard Setting

Standardization activities at technical level have to be facilitated with the support of local industry. These firms can also support in carrying out background research and analytical work.

Key Areas of Discussion for Digital Cooperation at International Forums (1/5)

Non-Discriminatory Treatment of Digital Products

Defining digital products/services to be included for import/export permit

e-Transactions Legal Framework

Avoid unnecessary regulatory burden; Consistency with the principles of the UNCITRAL Model/UN conventions

Cryptography

Technical regulation/conformity assessment procedure; Access to technology; Use of particular cryptographic algorithm

Customs Duties

Extent of custom duty for digital products/services; Fees or charges on content transmitted electronically

Online Consumer Protection

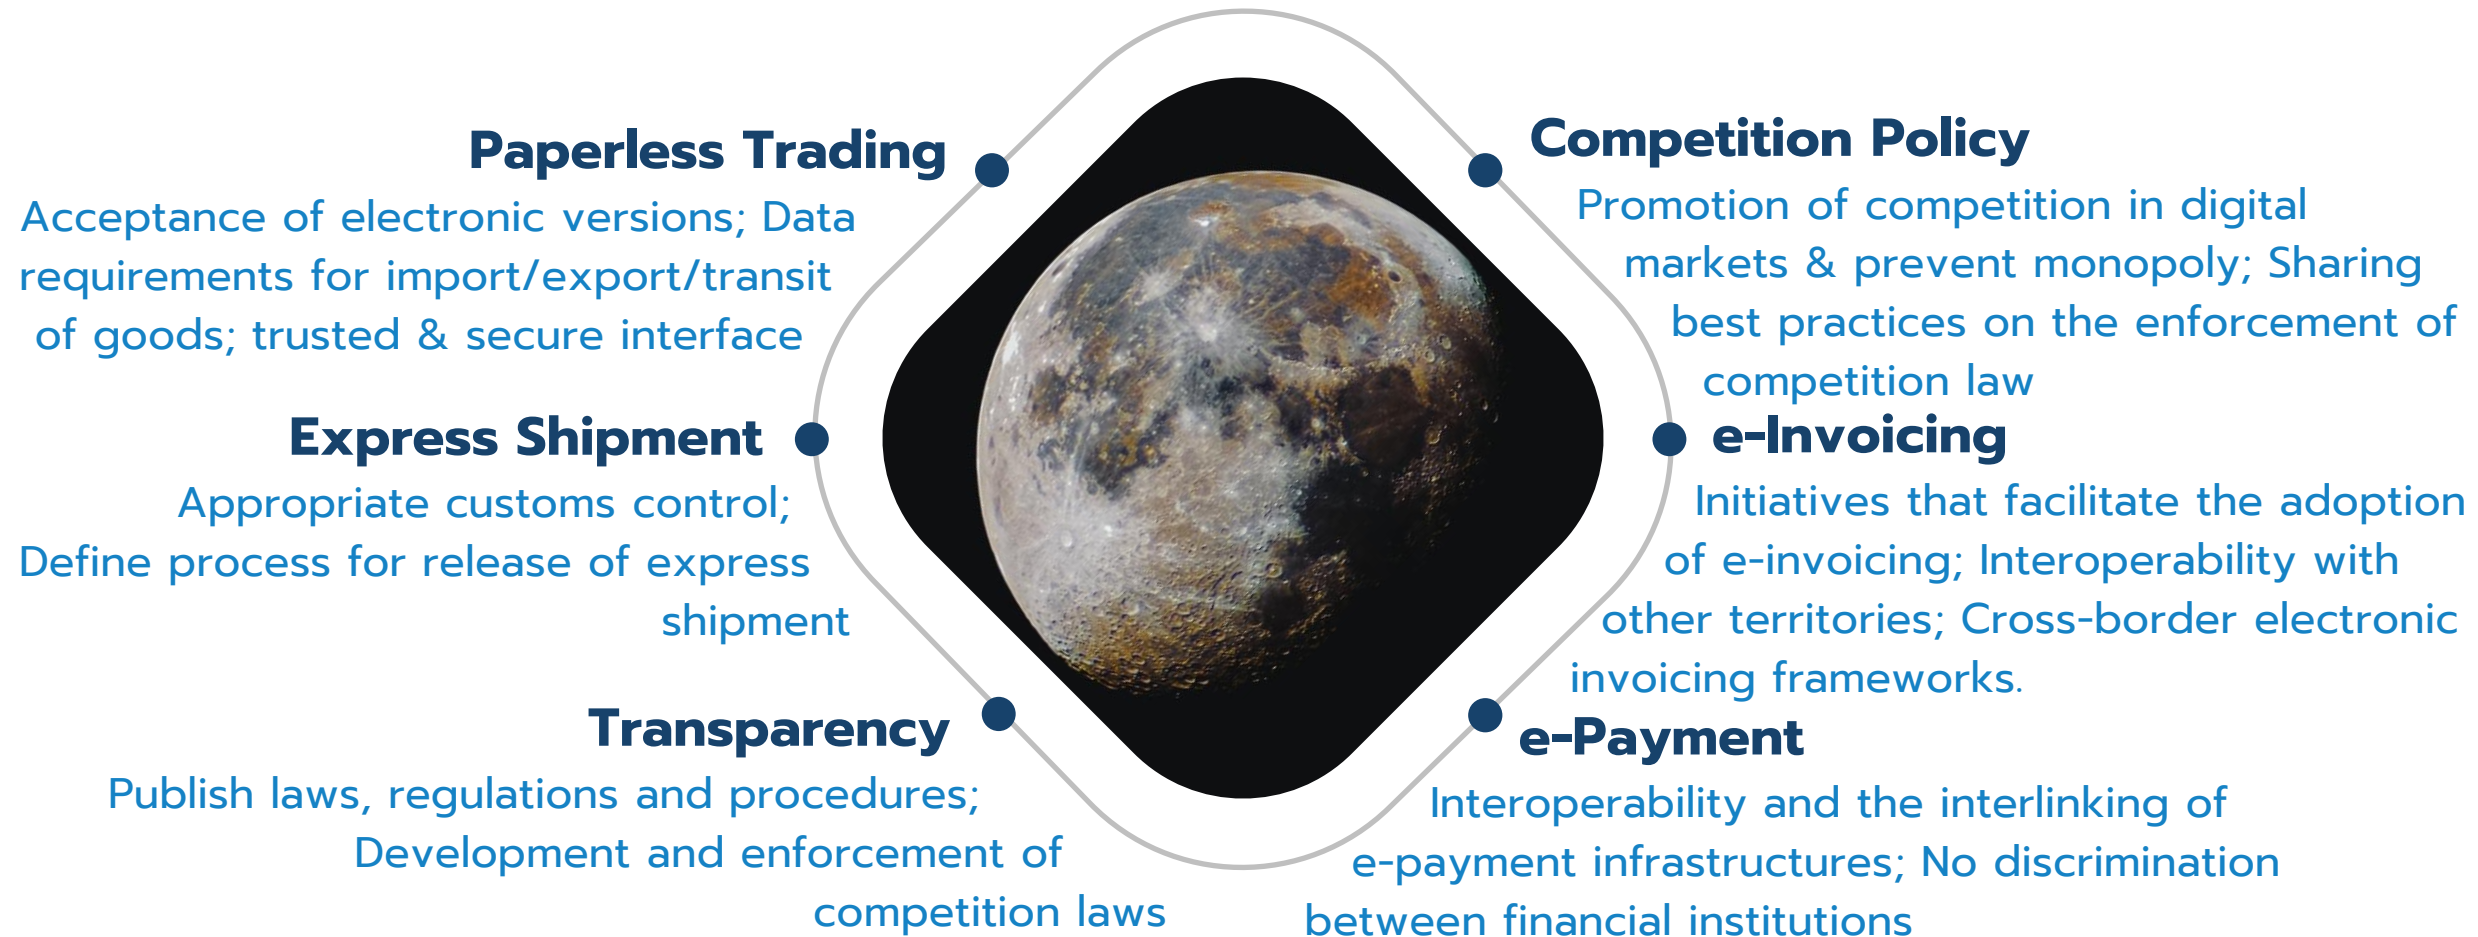

Consumer protection laws; Process of handling disputes regarding e-transactions; Cooperation between consumer protection agencies

Electronic Authen & Signatures

Measures for electronic authentication; Interoperability of electronic authentication; Legal validity of electronic signature

Key Areas of Discussion for Digital Cooperation at International Forums (2/5)

Key Areas of Discussion for Digital Cooperation at International Forums (3/5)

Online Safety

Preventative measures to protect citizens; Laws & regulations to maintain an open, free and secure Internet

Cross-Border Transfer of Information

Restriction of cross-border transfer of information

FinTech and RegTech Cooperation

Streamlined licensing processes; Development of standards for open banking

Use of Internet for e-Commerce

Access to information and network management practices; Regulations on blocking content or sites

Protection of Personal Data

Policies and procedures related to protection of personal information; Non-discriminatory practices in protecting personal

Unsolicited Commercial Electronic Messages

Laws and regulations on commercial electronic messages; Share recourse against a supplier

Key Areas of Discussion for Digital Cooperation at International Forums (4/5)

Data Innovation

Use of regulatory sandboxes; Sharing research and industry practices related to data innovation

Data Residency

Process to ensure security and confidentiality of communications; Scope of restrictions of data residency

Source Code

Safeguards against unauthorized disclosure; Implementation of terms & conditions related to the provision of source code in commercially negotiated contracts; Modification of source code if necessary

Interconnection Charges

Ability to negotiate with providers of the other parties on a commercial basis

Submarine Cable Systems

License, permission and applicable fee for installation and maintenance of submarine cable systems; Transparency on the processes

Open Government Data

Extend of sharing and use of government information and data; Formats and API that that allows search/retrieve; Data usage policies and distribution rights

Key Areas of Discussion for Digital Cooperation at International Forums (5/5)

Artificial Intelligence

Sharing research and industry practices related to AI; Developing ethical governance frameworks for AI

Stakeholder Engagement

Collaboration efforts and initiatives between regions, Broad framework for engagement at bilateral and multilateral levels

Standards for Digital Trade

Development and adoption of standards that support digital trade; Support cross-border research projects on testing and development of technology standards

Cybersecurity

Roles & authority of government agencies for security incident response; Mitigation of malicious intrusions

Digital Identity

Mutual recognition on compatibility between respective digital identity regimes; Appropriate frameworks and common standards

Digital Cooperation

Exchange information and share experiences on regulations and policies; Exchange financial intelligence and share capabilities to counter terrorism financing, money laundering and other transnational organized crimes
